

archinfo

I want to strongly encourage you to participate in Monday's Mock Interviews. Registration remains open only through the end of the day today. Seven different architectural firms welcome this opportunity to preview upcoming graduates and renew campus connections. While the purpose of Mock Interviews remains as providing a realistic job interview experience, the resulting interaction often results in real job contacts and opportunities.

Have a great weekend,

Matthew Knox, AIA
Professor and Head

arch_announcement

ATTENTION: 4TH YEAR, 5TH YEAR, POST-BAC AND PH.D. STUDENTS

Would you like to have a mock interview experience with the following firms?

- ARCH 505 Design (ZOOM)
- BNIM
- Corgan
- DLR Group
- Helix Architecture + Design
- Høefer Wysocki Architecture
- Hollis + Miller

Currently there are only 19 students signed up for 60 slots. Please consider taking advantage of this opportunity to connect.

SIGN UP CLOSES AT MIDNIGHT TONIGHT - DON'T DELAY

Mock Interviews are planned for Monday, October 17

Sign-up online at k-state.edu/careercenter by logging in to your Career Center account. Please [click here](#) to see instructions on activating your account. *For ZOOM interviews, a link to your portfolio will be required. You can provide this when activating your account or by editing the Professional Portfolio Website field in your profile under the "My Account" menu.*

Please contact [Danna Voegeli](#) with questions

Instructions:

_How to sign up for interview slots once you're logged in to your Career Center Account
_From your Career Center account welcome page:

- Scroll over "My Account" and click "My Documents"
- Under "Resumes" section, click "Add" to upload your resume document (PDF file preferred)

- Next, scroll over the "On-Campus Interviews" menu item
- A drop-down will appear, and you will click "My Interview Schedule Options (apply)"
- Click on "Advanced Search" (next to the green search button)
- Search by 10/17/16 to 10/17/16 in both date boxes and click "Search"
- Find the firm you're interested in and click on the APDesign Mock Interviews link associated with that firm
- Click on the "Sign Up" button at the top to select interview time
 - If the "Sign Up" button isn't there, the schedule is full, even though the schedule may still be active and visible
- Click "Sign-Up" next to desired interview time
- Select resume file name from drop-down and click "Sign Up"
- *Questions or problems? Contact Jodi Swendson at 785-532-1680.*

Harry Falconer, Jr. | NCARB + AXP + ARE Lecture | Designing Your Future

Wednesday - October 19 | APDWest | 3:30 p.m

Sponsored by AIAS

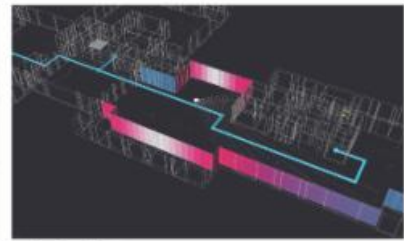

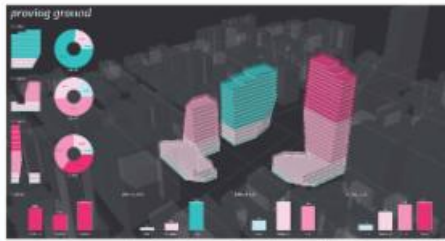

Want to be a licensed architect? Harry Falconer, Jr., director of experience and education at NCARB is one of the core individuals that's had their hand in developing this program and process for years. This is an invaluable opportunity for our students to hear from him.

Nate Miller | Lecture | *Data, Performance, and the Mainstream*

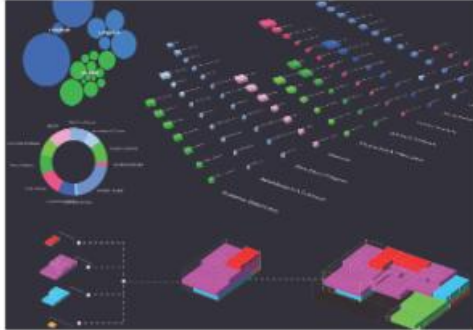

Monday - October 17 | Little Theatre | 5:00 p.m.

This lecture will explore the concept of "Data-Driven Design" and the opportunities to create value in architecture. Using a combination of real-world case studies and experimental prototypes, Nate will demonstrate uses of data for guiding design decisions, communicating insight to clients, and creating opportunities for innovation in the building industry.

NATHAN MILLER

DATA, PERFORMANCE, AND THE MAINSTREAM

October 17 Little Theatre - K State Union - 5:00 p.m.

While buildings remain costly, risky and time-consuming endeavors, data is increasingly cheap, fast, and pervasive. A new data-driven process is allowing architects to realize new levels of performance in their business and for their clients. This lecture will explore the concept of "Data-Driven Design" and the opportunities to create value in architecture. Using a combination of real-world case studies and experimental prototypes, Nate will demonstrate uses of data for guiding design decisions, communicating insight to clients, and creating opportunities for innovation in the building industry.

Nate Miller is the founder of PROVING GROUND - a new business venture focused on data-driven solutions for architecture. As a consultant, he has advised leaders and teams in some of the most reputable organizations in the building industry. Whether it is offering strategic insight or developing custom tools, Nate strives to help his clients leverage data to deliver value. Nate has authored numerous free and open source software tools that are widely used by professionals and academics. Nate continues to publish resources and experiments with computational technologies including Lunchbox, Rhynamo, and Singshot.

Hosted by Department of Architecture
This is an APDesign Course Event
Sponsored by HDK Kansas City
