I encourage you to attend today's lecture at 4:30 p.m.with Jonathan Arnold (details below). Dean de Noble said, "Jonathan's message of integration of design, construction and operations aimed at efficiency, environmental stewardship and quality of life will be well received."

Enjoy your Fall Break next week - take time to reflect and rejuvenate.

All the best,

Matthew Knox, AIA
Professor and Head

Jonathan Arnold | LECTURE - Today
Wednesday - November 16 | 4:30 p.m. | ENGINEERING AUDITORIUM - Fiedler Hall
Co-sponsored by Dept of Architecture and Dept of Arch Engineering & Construction Science

SCALING UP PASSIVE HOUSE:
COMBINING LEAN CONSTRUCTION AND INTEGRATED PROJECT DELIVERY
TO CREATE THE COST EFFECTIVE HIGH PERFORMANCE URBAN HOUSING

The world's largest passive house project is underway in Kansas City, saving more than 90% in energy usage. Fundrise is changing the way real estate is funded, allowing anyone with $1000 to invest. Affordable housing is going green, while a new generation of developers is pursuing triple-bottom line results. This lecture will explore the working edge of mission-led real estate development and the expanding opportunities for social impact from the building to the city scale.

Jonathan Arnold, president and CEO of Arnold Development Group, is responsible for strategy, corporate vision and capital structure. He holds a degree in architecture from Cornell University and a masters degree in real estate development from Columbia University. Over the past 15 years, he has successfully helped design and market more than $6 billion in commercial real estate, including more than 40 continuing care retirement communities, 2,500 apartment units, and more than two dozen large scale mixed-use urban infill developments.

IT Security Training | REQUIRED for Faculty, Staff, and Student Employees
Deadline | December 31
K-Staters are the best defense in protecting their personal identity information. For this reason, K-State faculty, staff, and student employees are required to complete security awareness training that introduces basic computer security concepts and good security practices by December 31. The training takes approximately 20 minutes to complete.

To access the IT Security Awareness Training, do the following:
1. Type www.k-state.edu/isc/training into your browser
2. Click the Take Security Training button

Once you complete the training, your personnel record in HRIS will be updated. It will be listed under the Training Summary as IT Security Awareness (2016), with the course code WIT017.

If you have questions about the security awareness training, contact the IT Help Desk

CONGRATULATIONS!

Aisha Lee (Post-Bach MARCH) is one of the finalists in the 2016 Kansas State University Launch competition. K-State's Center for the Advancement of Entrepreneurship selected 10 student business venture ideas as finalists. A description of her business idea is below:

Design 4 Philanthropy provides services that promote and encourage clients to engage in a charitable act while enhancing their own home or workspace. The goal is to help close the gap between the living and working conditions of social and economic classes while creating bonds among individuals and unity within communities.
